Project Title	*Title*
Main Applicant (Lecturer/Supervisor)	*Name (main point of contact, will receive all correspondence about the application).*
Main Applicant Contacts (Email and Telephone)	*Email address / Telephone*
Institution	*Institution*
Project Team	*Please give names and brief details of the individuals involved in this project and what discipline they are in. Bullet points are acceptable.*
Type of project	*Please note the type of project you are applying for (examples of which may include medical devices, diagnostic tools other products etc)*
Application Date	*Application Date*

Project Details	
Proposed project duration	
Total funds required	

1. What is the health, clinical or product development need you are seeking to address?

2. What is your proposed solution to meeting this need?

3. What is the rationale and supporting evidence for why your proposed solution will meet the defined need?

4. Please give a summary project plan, describing phases of work to be carried out (key milestones).

5. How will this project help you on the path to successful translation and societal impact?

6. How will your institution support this project?

7. Provide details of any market information, current solutions to the problem.

8. Have you already sourced the expertise required?	**Yes**	**No**
If **Yes**, please provide details, including their availability and a potential 'back up':		
9. Please outline a brief plan for follow on studies, potential industry collaborations and further funding, including targeted funding schemes and deadlines		

Project Costs		
Directly Incurred (DI) (change to what is appropriate to needs)		
Fund	**Breakdown and description/detail**	**Cost (MK)**
e.g Staff		
e.g Consumables		
Other (please specify)		
	Total DI Costs:
